Comments:

All samples were analyzed on the GC-MS/MS. Only positive results or those listed of interest on the submission form are reported. If the tested analyte does not appear for a sample, it was not detected in that sample.

<MQL = Less than the minimum quantification limit.

<MDL = Less than the minimum detection limit.

Presence of the compound confirmed by GC-MS/MS but at less than the defined quantification or detection limit for that compound using this method.
